

Grade 2 Sample Lesson Plan: Protecting the Environment for Our Health

Objectives/Goals

- Students will describe how the environment influences health and how to protect the environment.

Materials

- Video
- Computer with internet access
- Poster boards, markers, photographic images from magazines and the internet, other materials to design posters

Steps

- Have students watch a video on how the environment influences health and how to protect the environment (e.g., <http://www.pbslearningmedia.org/resource/181216317-human-impact/birds-flying-over-landfill-human-impact-on-the-physical-environment-geography> or visit an interactive site such as NIH's ToxTown <https://www.toxtown.nlm.nih.gov/> or PBS's Eeko World <http://pbskids.org/eeeworld/> to enable students to visualize the impact of various chemicals on the environment.
- Engage in discussion with students to summarize key ways the environment influences health.
- Assign students to work in teams to develop and decorate posters that depicts at least one way that the environment influences health and at least one way to protect the environment.
- Additional resources to enhance this lesson are included in the references below.

Assessment Idea

- Does the poster describe how the environment influences health?
- Does the poster describe how to protect the environment?
